Model fit (using Expt 9 priors)	2

Description of experiment

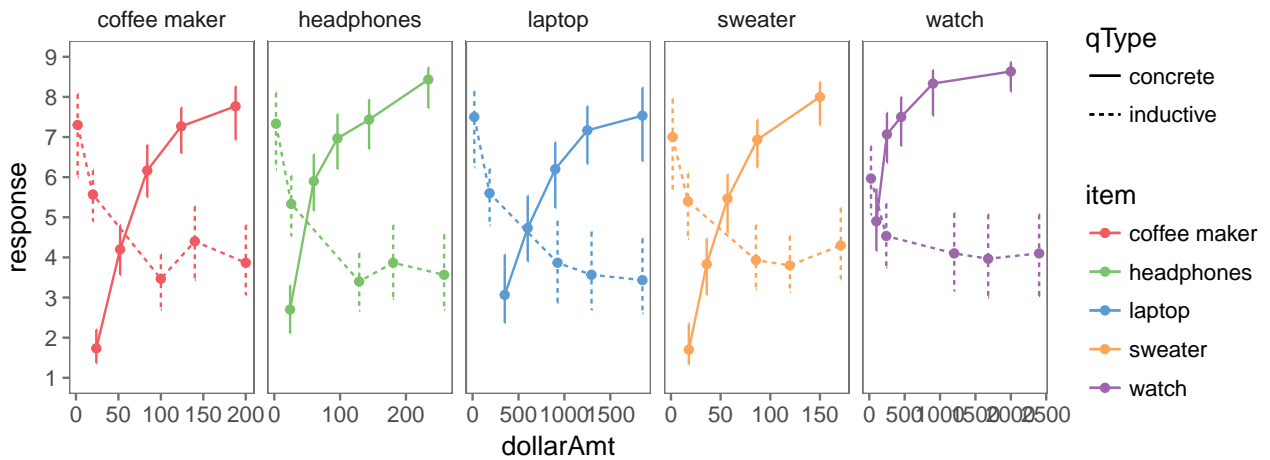

A copy of the experiment can be found at: experiments/experiment11/exp3-sorites.html.

This was run in June of 2015. The design was identical to Experiment 10 but used the relative clause phrasing for the inductive premise.

For each of the 5 items, there were 5 possible concrete premise sentences and 5 possible inductive premise sentences. So each participant rating 50 sentences.

Results

There were 30 participants.

Model fit (using Expt 9 priors)
